

AI SOCIAL MEDIA CONTENT GENERATOR

01 Project Description:

- The AI social media content generator is a generator AI project that creates social media caption , posts , and hashtags using ChatGPT . Users enter a topic , business name , or product description , and the AI generates engaging content for platforms such as Facebook , Inatagram , and Linkedin . .

02 Objective:

- To create social media content using Generative AI
- Save time for business and content creators
- Improve creativity and consistency in online marketing

03 Tools used

- Chat GPT
- Google Docs
- GitHub (later)
- Microsoft word

04 features

- AI-generated captions
- Hashtag suggestions
- Marketing content creation
- Easy and user-friendly workflow

Conclusion:

This project demonstrates how Generative AI can help business create social media content efficiently and effectively.
